Optics and Laser Technology

Index to Volume 2

This index covers issues 1-4 (February-November 1970). All contents are included in the general alphabetical index except individual items in the Patent Surveys. Articles, Books and Authors are listed separately. Alphabetization is letter-by-letter.

General alphabetical index

Accuracy guarantee 228
AGARD Symposium on Opto-Electronics Signal Processing Techniques 48
Amplitude gratings with a preset black/white line ratio, Production of; M. de Caluwé 189
Applied Optics at Reading; H. H. Hopkins 158
Astronomical spectroscopy; Lasers in, H. Niewenhuijzen 13
A.W.R.E., Optics at; C. D. Reid 59
Bending moments, Determination by Moiré method from hologram interferometry, K. A. Stetson 80
Bubble chambers, Application of holography to; R. J. Withrington 132
Carbon dioxide laser 58
Ceramics for computer memories 170
Ceramic device for information displays 226
Cheaper-optical components 229
Coherent light, Micromachining by beams of; G. Boyer, J. R. Huriet & B. Lamouroux 196
Colorimetry for layman and expert 55
Compact optical system for colour videotelephone camera 228
Computer memories, Ceramics for 179
Condenser lenses, Manufacture of high performance aspheric; J. P. Marioge, J. de Metz, F. Millet & C. Mahé 27
Cylinder bore inspection 170
Developments in USSR Optics 168
D. Gabor 115
Drilling, high speed hole 58
Dye lasers 116
Elastohydrodynamics, Optical 115
Electric arcs, Luminous efficiency meter for; A. G. Hunt & R. E. Carforth 99
European office for Hadron 115
Face plates, Fibre-optic 171
The fare to the frontier must come down 222
Fibre-optic face plates 171
Flight simulators, Laser display for visual 228
Floodlight, stroboscopic 227
GALAXY measuring engine project; P. B. Fellgett 61
Glass surfaces, Ion beam polishing of; A. R. Bayly & P. D. Townsend 117
Glass, New mirror 171
Hadron, European office for 115
High-speed hole drilling 58
High speed photography and shock tubes conference 162
Hologram exposures, timing; J. N. Butters & T. Middleton 202
Hologram interferometry, Moiré method for determining bending moments from; K. A. Stetson 80
Hologram, thin film 171
Holography and the computer 107
Holography, Application to bubble chambers; R. J. Withrington 132
Holography for 3-D vector analysis of rapid events; F. Frungel & P. Schultz 32
Holographic deconvolution using a single photographic plate; J. P. Redman & W. D. Wooton 185
Holographic determination of in-plane deformation; P. M. Boone 94
Holographic interferometry, Inexpensive system for live; P. A. Fryer 36
Holographic interferometry, Rock probe deformation measured by; W. Fink, P. A. Büger & L. Schepens 146
Holographic plates, Location of 170
Holographic test glasses; A. F. Fercher & R. Torge 200
Imaging systems 163
Increasing laser brightness by transverse mode selection; D. C. Hanna 122,175
Industrial gas lasers 116
Inexpensive system for live stroboscopic holographic interferometry; P. A. Fryer 36
Influence of optical bench errors on otf measurements; A. C. Marchant & E. A. Ironside 85
Information processing, Optics in 48
Infra-red technology 112
In-plane deformation, Holographic determination of; P. M. Boone 94
Inspection, cylinder bore 170
Inspection of the internal surface of smooth cylinders, Reflectographic method for; W. D. Haig 142
Integrated circuits, Lasers and 172
Interferometer, New design for laser image—speckle interferometer; K. A. Stetson 179
Interferometer, Rapid warm-up 172
Ion beams in optics-an introduction; P. D. Townsend 65
Ion beam polishing of glass surfaces; A. R. Bayly & P. D. Townsend 117
Ionic polishing of fused silica and glass; R. G. Wilson 19
Laser beam deflection techniques; D. Holt 1
Laser, carbon dioxide 58
Laser display for visual flight simulators 228
Laser Exhibition and Colloquium 107
Laser, He-Ne low noise; K. Rosza & T. Salamon 151
Laser Industry Association Conference 51
Lasers and integrated circuits 172
Lasers, dye 116
Lasers for all 56
Lasers for plasma research 114
Lasers in astronomical spectroscopy; H. Niewenhuijzen 13,68
Lasers, Industrial gas 116
Lasers, Optical alignment device for; R. Antiss 103
Lasers, Progress in semiconductor 111
Light pulses, Ultra short; N. G. Basov, P. G. Krjukov & V. S. Letokhov 126
Location of holographic plates/new company 170
London Expo of holograms and stereoscopic paintings 108
Low noise He-Ne laser; K. Rosza & T. Salamon 151
Luminous efficiency meter for electric arcs; A. G. Hunt & R. E. Garforth 99
Manufacture of high-performance aspheric condenser lenses; J. P. Marioge, J. de Metz, F. Millet & C. Mahé 27
Mapping, Optical 114
Measurement techniques, submillimetre waves in; N. W. B. Stone 8
Measurement to submicron accuracy 227
Micromachining by beams of coherent light; G. Boyer, J. R. Huriet & B. Lamouroux 196

Moiré Contours 226
Moiré fringes, practical 166
Morié fringes, strain measurement in welds using 115
Moiré method for determining bending moments from hologram
Moiré method for measuring strains under welds; J. M. Cargill 154
MTF Measurement 171
MTF measurement for company sighting system with its simulator, Photographic technique of; S. A. Gullick 139
MTF of an optical system by a photographic technique, S. A. Gullick 88
New company expects £0.75 mm in two years 169
New design for laser image-speckle interferometer; K. A. Stetson 179
New look at waves 57
New mirror glass 172
9th International Congress on high speed photography 218
On-line moisture measurement 58
Optical alignment device for lasers; R. Antiss 103
Optical bench errors, Influence of otf measurements, of; A. C. Marchant & E. A. Ironside 85
Optical branding iron 226
Optical components, cheaper 229
Optical devices, pulling crystals for; J. C. Brice 206
Optical elastohydrodynamics 115
Optical mapping 114
Optical non-contact surface sensor; J. R. Vyce 40
Optics at A. W. R. E., C. D. Reid 59
Optics at the National Physical Laboratory 49
Optics at RPI; G. E. Fishter 173
Optics in information processing 48
Opto-electronic pattern recognition system; H. J. Tiziani, B. H. Beyeler & W. Witz 75
OSA Annual meeting 51
OSA Spring meeting 162
Otf measurements, Influence of optical bench errors on; A. C. Marchant & E. A. Ironside 85
Output coupler for gigawatt laser pulses, Roof prism; G. Farkas 204
Pattern recognition system, Opto-electronic; H. J. Tiziani, B. H. Beyeler & W. Witz 75
Photographic technique of mtf measurement for comparing sighting system with its simulator; S. A. Gullick 139
Photography in Engineering 50
Pick-off laser accessory 227
Plasma research, lasers for 114
Polishing, Ion beam of glass surfaces; A. R. Bayly & P. D. Townsend 117
Polishing, Ionic of fused silica & glass; R. G. Wilson 19
Practical holography 55
Practical moiré fringes 166
Practical telecommunications 230
Production of amplitude gratings with a preset black/white line ratio; M. de Caluwé 189
Progress in semiconductor lasers 111
Pulling crystals for optical devices; J. C. Brice 206
Rapid warm-up interferometer 172
Reading, Applied optics at; H. H. Hopkins 158
Reflectrographic method for inspection of the internal surface of smooth cylinders; N. D. Haig 142
Rock probe deformation measured by holographic interferometry; W. Fink, P. A. Büger, & L. Schepens 146
Roof prism output coupler for gigawatt laser pulses, G. Farkas 204
RPI, Optics at; G. E. Fishter 173
Runway visibility 229
Search for average daylight, The 166
Seeing it happen 50
Strain measurement in welds using moiré fringes 115
Strains under welds, Moiré method for measuring; J. M. Cargill 154
Stroboscopic floodlight 227
Sub-millimetre waves in measurement techniques; N. W. B. Stone 8
Sub-mm metrology/Teramet 115
Surface sensor, Optical non-contact; J. R. Vyce 40
Symposium on the application of holography 213
Telecommunications, Practical 230
Test glasses, Holographic; A. F. Fercher & R. Torge 200
Thermometer, YIG non-contact; I. J. Kampel 44
Thin film holograms 171
3-D television 116
3-D vector analysis of rapid events, Holography for; F. Frungel & P. Schultz 32
Timing hologram exposures; J. N. Butters & T. Middleton 202
Transverse mode selection, Increasing laser brightness by; D. C. Hanna 122,175
Turbine blade vibration measurements 113
Ultra-short light pulses, N. G. Basov, P. G. Krjukov, & V. S. Letokhov 126
Use of fringes in separated fixed gratings to provide moving observer with reference frame; J. H. Gittus 45
USSR optics, Developments in 168
Velocity meter for ships and hovercraft 113
Veneer thickness monitor 57
Videotelephone camera, compact optical system for colour 228
YIG non-contact thermometer; I. J. Kampel 44

Articles, papers and notes

Application of holography to bubble chambers, R. J. Withrington 132
Applied optics at Reading, H. H. Hopkins 158
GALAXY measuring engine project, P. B. Fellgett 61
Holographic deconvolution using a single photographic plate, J. P. Redman & W. D. Wooton 185
Holographic determination of in-plane deformation, P. M. Boone 94
Holographic test glasses, A. F. Fercher & R. Torge 200
Holography for 3-D vector analysis of rapid events, F. Frungel & P. Schultz 32
Increasing laser brightness by transverse mode selection, D. C. Hanna 122
Increasing laser brightness by transverse mode selection II. D. C. Hanna 175
Inexpensive system for live stroboscopic holographic interferometry, P. A. Fryer 36
Influence of optical bench errors on otf measurments, A. C. Marchant & E. A. Ironside 85
Ion beams in optics—an introduction, P. D. Townsend 65
Ion beam polishing of glass surfaces, A. R. Bayly & P. D. Townsend 117
Ionic plishing of fused silica and glass, R. G. Wilson 19
Laser beam deflection techniques, D. Holt 1
Lasers in astronomical spectroscopy—part 1, N. Niewenhuijzen 13
Lasers in astronomical spectroscopy-part 2, H. Niewenhuijzen 68
Low noise He-Ne laser, K. Rosza & T. Salamon 151
Luminous efficiency meter for electric arcs, A. G. Hunt & R. E. Garforth 99
Manufacture of high-performance aspheric condenser lenses, J. P. Marioge, J. de Metz, F. Millet & C. Mahé 27
MTF of an optical system by a photographic technique, S. A. Gullick 88
Micromachining by beams of coherent light, G. Boyer, J. R. Huriet & B. Lamouroux 196
Moiré method for determining bending moments from hologram interferometry, K. A. Stetson 80
Moiré method for measuring strains under welds, J. M. Cargill 154
New design for laser image-speckle interferometer, K. A. Stetson 179
Optical alignment device for lasers, R. Anstiss 103
Optical non-contact surface sensor, J. R. Vyce 40
Optics at A. W. R. E., C. D. Reid 59
Optics at RPI, G. E. Fishter 173
Optical transfer function measurement by means of hologram filter, K. Murata & H. Fujiwara 182
Opto-electronic pattern recognition system, H. J. Tiziani, B. H. Beyeler & W. Witz 75
Photographic technique of mtf measurement for comparing sighting system with its simulator, S. A. Gullick 139

Production of amplitude gratings with a preset black/white line ratio, M. de Caluwé 189
Pulling crystals for optical devices, J. C. Brice 206
Reflectographic method for inspection of the internal surface of smooth cylinders, N. D. Haig 142
Rock probe deformation measured by holographic interferometry, W. Fink, P. A. Büger, & L. Schepens 146
Roof prism output coupler for gigawatt laser pulses, G. Farkas 204
Sub-millimetre waves in measurement techniques, N. W. B. Stone 8
Timing hologram exposures, J. N. Butters & T. Middleton 202
Ultra-short light pulses, N. G. Basov, P. G. Krjukov, & V. S. Letokhov Use of fringes in separated fixed 126
Use of fringes in separated fixed gratings to provide moving observer with reference frame, J. H. Gittus 45
YIG non-contact thermometer, I. J. Kampel 44

Books reviewed

Applications and technology of holography-II, by Industrial Information Services 167
Daylight and its spectrum. by S. T. Henderson 166
Einführung in die Technik de Holographie, by H. Kiemle & D. Ross 55
Engineering uses of holography, ed by E. Robertson & J. Harvey 168
Gallium arsenide lasers, ed by C. H. Gooch 111
Handbook of gas laser experiments, by G. L. Rogers 224
Holography..... 1969, ed by T. Kallard 56
Holography..... 1970, ed by T. Kallard 224
Infra-red radiation, by A. Vasko 112
Infra-red system engineering, by R. D. Hudson 113
Introduction to the technique of holography, by H. Kiemle & D. Ross 55
Lasers—a survey of their performance and application, by R. Brown 56
Laser parameter measurements handbook, by W. G. Heard 56
Laser physics, by A. Maitland & M. H. Dunn 223
The measurement of colour, by W. D. Wright 55
Medical thermography, ed by S.F.C. Heerma van Voss & P. Thomas 112
Millimeter and submillimeter waves, ed by F. A. Benson 222
Moiré fringes in strain analysis, by P. S. Theocaris 166
Optical data processing, by A. R. Shulman 224
Optical physics, by S. G. & H. Lipson 167
Photomicrography, by R. P. Loveland 222
Principles of holography, by H. M. Smith 57
Thin-film optical filters, by H. A. Macleod 167
University optics—volume 1, by D. W. Tenquist, R. M. Whittle & J. Yarwood 167

Conference reports

AGARD Symposium on opto-electronics signal processing techniques, (Sept-Oct 1969) 48
High-speed photography and shock tubes, (April 1970) 162
Holography & art, (March 1970) 108
Holography & the computer, (December 1969) 107
Imaging systems, (May 1970) 163
Laser exhibition and colloquium, (November 1969) 107
Laser Industry Association, (October 1969) 51
9th International congress on high-speed photography, (August 1970) 218
Optics at the National Physical Laboratory, (October 1969) 49
OSA annual meeting, (October 1969) 50
OSA Spring meeting, (April 1970) 162
Photography in Engineering, (December 1969) 50
Symposium on the application of holography, (July 1970 213
